

Ashaba Joshua Jasper

Data Scientist / AI/ML Engineer / Analytics and BI / Full-Stack Developer

ashabajasper@gmail.com Kampala, Uganda linkedin.com/in/ashaba-jasper-joshua
github.com/AshabaJasper

Profile

Data scientist and AI/ML engineer with a First Class computer science degree and a record of shipping production data products end to end: data pipelines and LLM systems, observability dashboards and full-stack applications. Most recently delivered AI/ML, data-science and analytics systems for a leading US radiology network (Envision Radiology, through Reveloop Tech Systems), spanning multi-LLM clinical analysis, document-intake automation, DICOM computer vision on Kubernetes and Grafana telemetry across the RIS and PACS ecosystem. Combines metric-driven analysis with the engineering discipline to put models into production and keep them observable.

Machine learning and deep learning

LLM and generative AI systems

Predictive modelling and analytics

Data pipeline and ETL architecture

NLP and computer vision

MLOps and model observability

Full-stack development

Cloud and Kubernetes

Business intelligence and dashboards

Statistical analysis and experimentation

Experience

Present / Kampala, Uganda

Co-founder and COO

[Persmon Technologies](#)

- 47 shipped projects in the Persmon portfolio: systems, websites, online stores and mobile apps
- Focused on the systems Persmon builds for clients and the platforms it runs itself, such as HMS and OMS

Feb 2025 to Jun 2026 / Colorado Springs, USA, remote

Data Scientist and AI/ML Engineer

Reveloop Tech Systems (Ezrev), for Envision Radiology

- Built RadCareLoop, a multi-LLM radiologist follow-up analyser: a Gemini, GPT and Claude ensemble with a custom Judge arbitration layer, validated at 97.9% accuracy against a 10,000-report gold-standard dataset
- Architected the Patient Document AI intake pipeline: multi-page fax orders split, filtered and routed through a 9-service orchestration layer into SQL Server
- Engineered LLM-assisted CPT and ICD code-mapping services, and fixed a critical patient-record duplication defect in the entity-resolution logic
- Deployed DICOM computer-vision models on Azure Kubernetes Service with node-pool autoscaling and namespace resource quotas for cost control
- Stood up MLOps and observability with MLflow and Azure Application Insights
- Designed Grafana telemetry dashboards for the RIS and PACS ecosystem, with role-based access through Grafana Teams

Feb 2024 to Jan 2025 / Kampala, Uganda

Lead Analyst and E-commerce Developer

Excellent Shop

- Architected and launched the e-commerce platform, with inventory tracking, secure payments and automated pricing, driving a 25% increase in online sales revenue
- Built real-time analytics dashboards for sales trends and conversion funnels, improving conversion rates by 15%
- Optimised SEO and site performance for a 30% lift in organic traffic
- Automated stock management with Python and SQL, cutting manual inventory errors by 40%

May 2023 to Aug 2024 / Kampala, Uganda

Data Engineer and Digital Marketing Analyst

Uganda Bookshop

- Designed automated ETL pipelines with Python, SQL and Apache Airflow over 5+ sources, improving cross-departmental data access by 50%
- Built customer segmentation and sales forecasting models with scikit-learn and XGBoost, contributing to a 40% rise in online sales
- Developed Tableau and Power BI dashboards with live feeds, lifting customer engagement by 35%

Aug 2023 to Apr 2024 / Kampala, Uganda

Mobile Application Developer

Centenary Publishing

- Led the digitisation of print publications into interactive e-books (Uganda Youth Praise, Come and Worship), increasing digital downloads by 10% in the first quarter
- Developed cross-platform apps with Flutter and Firebase, offline first for low-connectivity regions

Jul 2023 to Sep 2023 / Kampala, Uganda

Software Engineer Intern, Operations and Monitoring

MTN Uganda

- Configured and maintained Grafana and the ELK Stack for real-time infrastructure monitoring
- Wrote automation scripts that reduced manual monitoring workloads by 25%
- Optimised SQL queries, improving reporting speed by 30% for monitoring dashboards

Apr 2021 to Jun 2024 / Nakawa, Uganda

Data Analyst and Fleet Management Software Developer

Blue Pearls Company and Uganda Transporters

- Trained Random Forest and XGBoost models on real-time IoT sensor data to predict maintenance, cutting unexpected breakdowns by 30% and upkeep costs by 20%
- Deployed an IoT fleet-management system with geolocation tracking and predictive maintenance scheduling, improving fleet uptime by 18%
- Designed real-time fleet analytics dashboards for logistics tracking and route optimisation

Sep 2019 to Feb 2021 / Kampala, Uganda

Lead Technical and Business Analyst

Decades Investments

- Developed and launched a full e-commerce store, increasing online sales by 25%
- Designed an inventory-management system, reducing manual stock-tracking errors by 20%

Education and training

Jan 2022 to Jul 2024 / Mukono, Uganda

BSc Computer Science, First Class Honours, GPA 4.62/5.0

Uganda Christian University

- Capstone: Help Anonymous, an AI-powered mental-health app in Flutter with BERT and LSTM sentiment analysis, serving 270+ active users
- Google Developer Student Club Lead (2022 to 2023): led 100+ students through workshops on ML, Python, TensorFlow and cloud
- Ranked among Africa's Top 100 in the Google Developer Community for Machine Learning and Cloud
- General Secretary, Data Science Society

Apr 2023 to Aug 2023

Junior Cybersecurity Analyst, I4G scholarship

Cisco Networking Academy

Network security, threat analysis, penetration testing and firewall management, with hands-on vulnerability assessment labs.

2023

Certificate in Software Engineering with Python

MTN ACE Program, Refactory Academy

An industry-sponsored intensive in Python, full-stack development and production application architecture.

2018 to 2019

Uganda Advanced Certificate of Education (PCM)

Namityango College, Mukono

Physics, Chemistry and Mathematics. Led the NASTECH Club to a Best Club Award in 2019.

Notable projects

Envision Radiology

01

RadCareLoop

A multi-LLM radiology follow-up analyser: Gemini, GPT and Claude with a Judge arbitration layer, validated at 97.9% accuracy against a 10,000-report gold-standard dataset.

Envision Radiology

02

Patient Document AI pipeline

Automated multi-page fax order intake through a 9-service orchestration layer writing to SQL Server, traced with Application Insights.

Envision Radiology

03

DICOM vision on Kubernetes

Computer-vision models for DICOM imaging on Azure AKS, with autoscaling node pools, resource quotas and MLflow tracking.

Envision Radiology

04

RIS and PACS Grafana telemetry

Observability dashboards, including the DICOM Worklist dashboard, with team-based access control across the RIS ecosystem.

Capstone, Uganda Christian University

05

Help Anonymous

An AI-powered mental-health platform: BERT and LSTM sentiment analysis in a Flutter app serving 270+ users with anonymous counselling.

Blue Pearls and Uganda Transporters

06

Predictive maintenance for fleets

Random Forest and XGBoost models on real-time IoT sensor data, reducing unexpected breakdowns by 30% and operating costs by 20%.

Awards and certifications

AWARDS AND HONOURS

Gold Award	2021
Queen's Commonwealth Essay Competition	
First Class Honours, BSc Computer Science (GPA 4.62/5.0)	2024
Uganda Christian University	
Top 100 in Africa, Google Developer Community for Machine Learning and Cloud	2022 to 2023
Google Developer Community	
I4G Cybersecurity Scholarship	2023
Cisco Networking Academy	

LICENCES AND CERTIFICATIONS

IBM Data Science Professional Certificate	2026
Coursera	
Machine Learning Specialization (Andrew Ng), DeepLearning.AI	2026
Coursera	
Junior Cybersecurity Analyst and Cyber Threat Management	2023
Cisco Networking Academy	
Introduction to Machine Learning	2023 to 2025
Kaggle	
Google Cloud Essentials	2023
Google Cloud Skills Boost	
Digital Marketing Professional Certificate	2023
CertiProf	

The full certification portfolio is available on request.

Community and volunteering

Dec 2022 to present / Uganda

Founder and Program Director

Learnnovate

- Built and runs technology education programmes reaching 200+ learners across multiple schools, focused on digital literacy and coding

Jun 2023 to present / Uganda

Data Analyst (volunteer)

Radiant Smile Foundation

- Created impact-measurement dashboards for programme effectiveness, supporting resource allocation and grant reporting
